Health 2

Extra Credit – Research Paper

Instruct. Mr. Alvillar

The Research can be done on any of the Diseases, Illnesses or Addictions on your Family Medical History Handout. This is a critical analysis research paper. You need to research;

- The effects, damage to the body and/or mind
- What is the cause?
- Is there ways to change the effects or prevent future ones?
- What is being done for our future generations? Details of one or two.

The conclusion must be a detailed personnel plan of prevention or treatment of the medical issue.

The topic must be mentioned in the introduction with the inclusion of a thesis statement. This will be the focal point of your research and has to be stated clearly.

Remember this is worth a possible 50 pts depending how well you do. Due on the day of our final. You can look up the date in the Los Angeles Harbor College class schedule.

Make sure you have a Work Cited page in the back. Use the standards LAHC English class calls for or use MLA format.
